

PATROLLINE 845!!!

INNOVATION, UNIQUE
TECHNOLOGY, ENDLESS
APPLICATIONS, TOP SECURITY

New alarm arrived from PATROLLINE !!!

Patrolline developed deeply again! Now newest developing PATROLLINE 845 car alarm appears, which means new huge technology in the vehicle protection. Many technical and using newness, innovation put the product for top of the top category.

845 product is a HYBRID solution, therefore perfectly usable into CAN-BUS and also into ANALOG cars. It operates completely through the OEM

remotes of the cars, and through the own PATROLLINE remote.

845 applies 2,4 GHz technology - firstly in history of the car alarm - which provide more bigger safety and free from interferences operation for the user.

Unique newness of the product, that it is able to provide protection of the garage very simply. Radio opening sensor was developed to the 845

alarm, which is installable for the garage door within minutes and it activates siren of the vehicle in case of cracking.

**PATROLLINE 845 IS READY
TO PROTECT YOUR CARS
TOO!**

GARAGE PROTECTION SIMPLY

OPERATION FREQUENCY

New category of the vehicle protection...

During development of the 845 device, a special protecting function was integrated. With its usage, this product of PATROLLINE can be named the MOST SAFETY car alarm. Newness of the function is that it can be found only in 845 device uniquely and firstly on the world.

2 WAYS COMMUNICATION BETWEEN THE PATROLLINE TRANSMITTER AND THE MAIN UNIT

2 way communication

2 way communication of the PATROLLINE remote controls provide innovative, new and unique solution, so it sends not only signal to the center, but it gets confirmation of the center. Thanks to it, the remote control is able to show the last applied command. (Opening or closing). It signs, if the distance between the remote control and the alarm unit is too big, so the wanted command was not be performed. It signs near status if the battery goes dead.

“JAMMER” function

Unique protecting solution of the 845 device is the protection against radio disturbing. If in environment of the protected vehicle, unauthorized person uses radio jammer device, tried to defuse the device, the 845 detects it and immediate starts the triggering.

Complex protection

845 product according to the claim could work not only like alarm, but like antitheft and anti-hijack system.

TRANSPONDER STARTING FORBID

WITH OPTIONAL CARD IT CAN BE REALIZED, THAT THE VEHICLE CAN BE STARTABLE ONLY IN PRESENCE OF THE CARD.

THE CARD IS ABLE TO RELEASE AUTOMATICALLY THE ANTI HI-JACK AND ANTITHEFT FUNCTION.

TRANSMITTER

DURING ALARM PRODUCTION, APPLICATION OF THE 2,4 GHZ TECHNOLOGY IS UNIQUE SOLUTION, WHAT REALIZE 2 WAY COMMUNICATION BETWEEN THE REMOTE CONTROL AND THE ALARM UNIT!

WIRELESS RADIO OPENING SENSOR

THE RADIO OPENING SENSORS - OPERATED ON 2,4 GHZ FREQUENCY - PROVIDE NEW AND EFFICIENT PROTECTION OPPORTUNITY FOR GARAGES, CAMPERS, TRAILERS.

It applying opportunity is limitless...

Important viewpoint of PATROLLINE HPS 845 device development was, that the device would be usable into any vehicles with electronic system without limits! The result speaks for itself ...

CAN-BUS VEHICLES WITH 2 REMOTE CONTROLS

The 845 device operates perfectly with default (OEM) remote controls of the vehicles.

CAN-BUS VEHICLES WITH 1 REMOTE CONTROL

If the vehicle has default only 1 (OEM) remote control, it can be grotty in case of cars with more owners. For this case it is good solution, if the 845 device is added with one PATROLLINE remote control. From now there isn't any inconvenience. The alarm will operate perfectly with default remote control of the vehicle and with the memorized PATROLLINE remote control too.

CAN-BUS VEHICLES WITHOUT REMOTE CONTROL

In the case, if the vehicle is CAN-BUS, but default it hasn't remote controls, the 845 device is usable on this way too. Maximum 4 pieces PATROLLINE remote controls has to be memorized to the system, and the device immediate operates.

ANALOG VEHICLES

The 845 product is a HYBRID car alarm, which is CAN-BUS and traditional ANALOG car alarm too. The device is installable into every analog vehicle with memorization of PATROLLINE remote control - piece according to the claim.

CAMPERS

It is unique, multifunctional protecting system into campers, trailers. The device will protect the driver part with CAN-BUS system or ANALOG application.

To the 845 alarm, radio opening sensor can be synchronized, so doors and windows of the camper can be protected wireless, very simply and efficiently. Special gas detector can be connected to the device what detects gas bleed installed into the camper, and it provides protection against narcotic blew into the accommodation.

What was unsolved till now, now it is childgame...

Usage of radio opening sensor of the 845 device provides endless opportunity that it protects the objects, tools which hadn't technical solution till now.

Installation of the wireless sensor resorts only some minutes, its application is innovative and very efficient.
